

Dear Parent

As you know, school has to register the students with CBSE in Class 09 with full and correct data. Data to be uploaded is already prepared. Parents are requested to come to school and verify the data in person.

Before you come to school to verify, please see to the data (Name of the Student, Date of Birth of the Student, Aadhaar of the Student, Religion and Caste of the Student, Name of the Father of the Student and Name of the Mother of the Student) given in School Digital. If there is any correction, please come with proof. Self (parent)-attested copy of the Birth Certificate of the student is the proof of the name and date of birth of the student, name of the father and name of the mother. Self (parent)-attested copy of the aadhaar card is the proof of the aadhaar number. Caste certificate issued by the village officer is the proof of Caste.

Parent must fill the annual income (no proof required) and write (Yes/No) whether the student is the only child.

In this context, I would like you remind you about the previous messages informing you about the level of difficulty in correcting anything in the CBSE data. Procedures of correcting the data after the registration is taking months and its cost is high. If you want to make any change after registration, school also will be charging processing fee.

It is also important to register aadhaar number with CBSE. This year, CBSE published the result in DigiLocker initially. A DigiLocker account can be opened using aadhaar only.

Therefore, please make sure that one of the parents come in person to verify the data. Parent can come to verify the data 9:30 am to 2 pm and 3:45 pm to 5 pm between 01-Aug-2022 to 05-Aug-2022. Parents are requested not to come between the rush hours (before 9 am and between 2 pm and 3:45 pm) between 01-Aug-2022 to 05-Aug-2022. Those who have verified the data on 30-07-2022, Saturday need not come again.

Even if, there is no correction, it is the duty of the parent to come and verify the data. If the parent does not come to verify the data, school has no responsibility in the errors that may come in registration data even if what is given in the profile of the school digital is correct.

Principal
